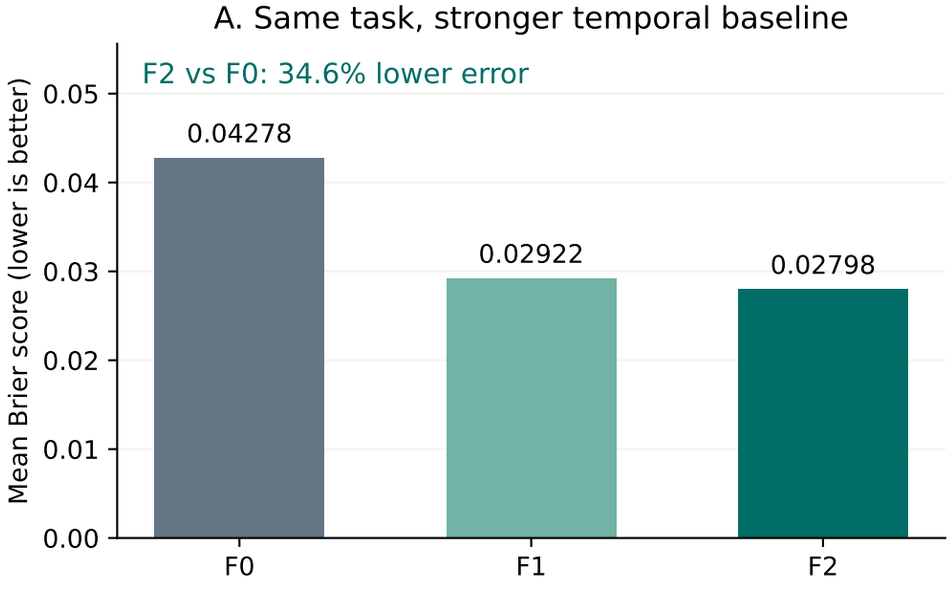
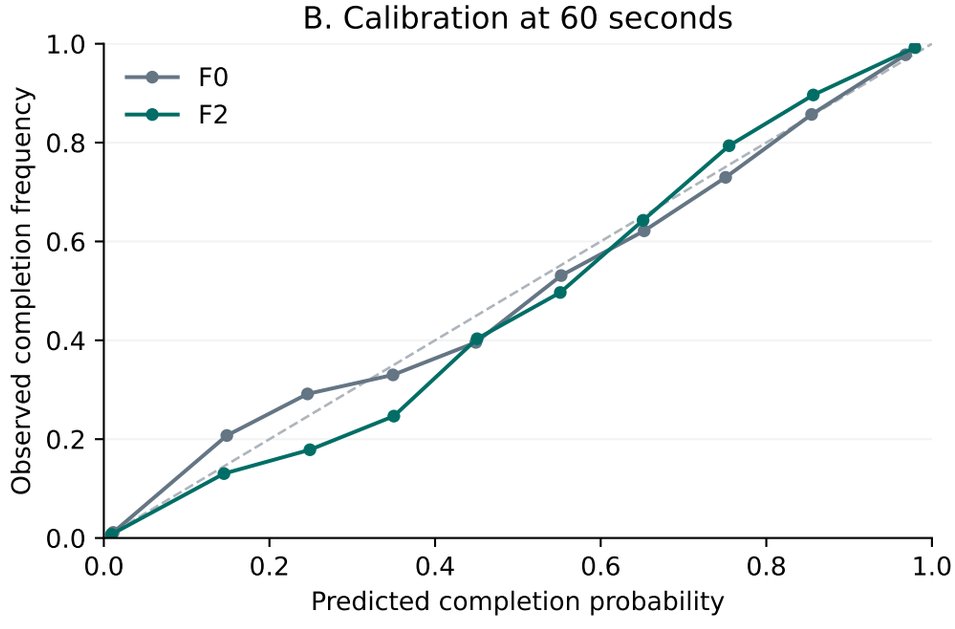
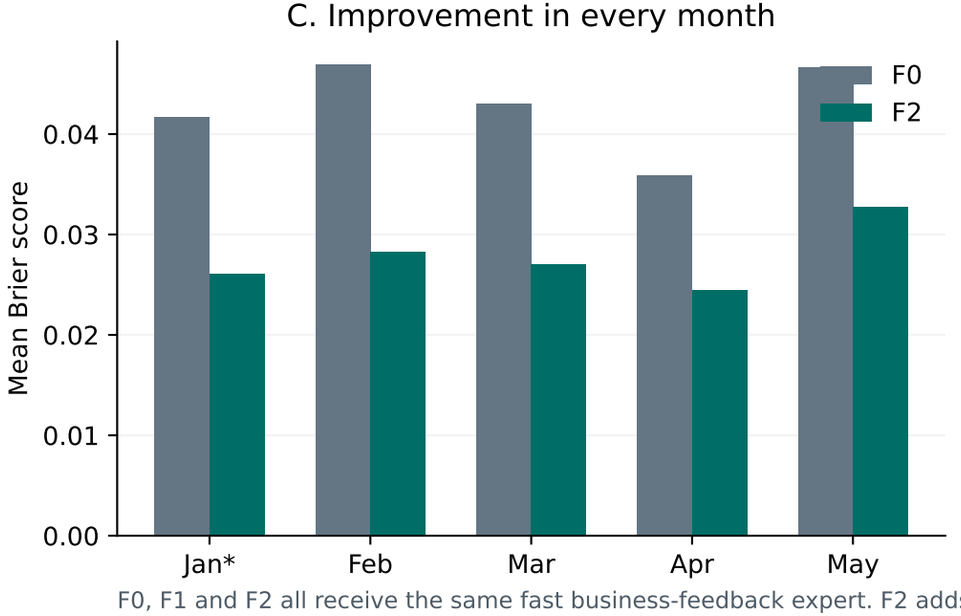
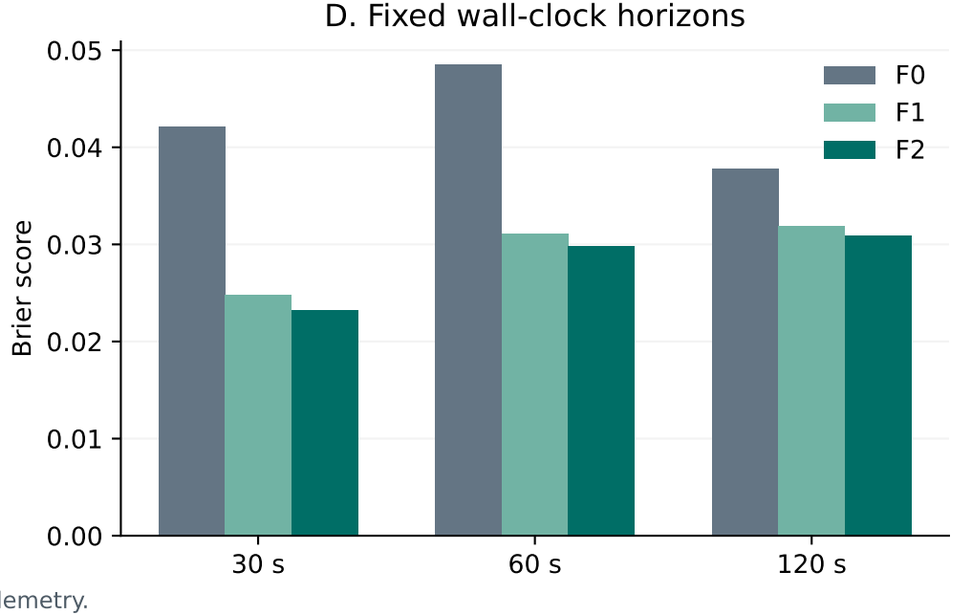
State-aware forecasting: independent 2022 confirmation

10,326 instances | 68,197 forecasts | fixed LoadStart -> LoadEnd semantics









F0, F1 and F2 all receive the same fast business-feedback expert. F2 adds numeric telemetry.
Equal-instance weighting; 95% day-block bootstrap for F0 - F2: [0.01339, 0.01630].
*January confirmation begins Jan 15. One compressor process; observed cycle completion, not fault prediction.
